Diagram illustrating a 16-bit bus structure. The bus is divided into two main sections: a top section labeled "1:32" and a bottom section labeled "13:6". The top section consists of 16 squares, and the bottom section consists of 16 squares. The middle section is labeled "13:6" and "13:6".

[illegible][illegible]

The diagram shows a sequence of rectangles. The first rectangle has a width of 1 and a height of 1. The second rectangle has a width of 1/2 and a height of 1/2. The third rectangle has a width of 1/3 and a height of 1/3. This pattern continues, with the width and height of each rectangle decreasing as the index increases. The rectangles are arranged in a row, with the first rectangle on the left and the last rectangle on the right. The width of the rectangles decreases as the index increases, and the height of the rectangles also decreases as the index increases. The rectangles are arranged in a row, with the first rectangle on the left and the last rectangle on the right. The width of the rectangles decreases as the index increases, and the height of the rectangles also decreases as the index increases.

[illegible]

The diagram shows three horizontal bars, each composed of small squares. The top bar is the longest, followed by the middle bar, and then the bottom bar. These bars represent the relative lengths of the three longest rivers in the world.
